Contents of Volume 25 (1987)

Vol. 25, No. 1

On a class of constitutive equations for viscoelastic liquids
A.I. Leonov (Moscow, U.S.S.R.) 1

Rheology of foams: II. effects of polydispersity and liquid viscosity for foams having gas fraction approaching unity
S.A. Khan and R.C. Armstrong (Cambridge, MA, U.S.A.) 61

On the accuracy of finite element and finite difference predictions of non-Newtonian slot pressures for a Maxwell fluid
D.S. Malkus (Madison, WI, U.S.A.) and M.F. Webster (Swansea, U.K.) 93

Short Communication
On the asymptotic behaviour of an Oldroyd fluid B in steady spinning flow
N. Phan-Thien (Sydney, NSW, Australia) 129

Vol. 25, No. 2

Flows of variable-viscosity fluids in ducts with heated walls
S.M. Richardson (London, U.K.) 137

Shear-thickening and structure formation in polymer solutions
E.P. Vrahopoulou and A.J. McHugh (Urbana, IL, U.S.A.) 157

Rheology, friction, and heat transfer study of a discontinuously shear-thickening antimisting polymer solution
E.F. Matthys (Santa Barbara, CA, U.S.A.) and R.H. Sabersky (Pasadena, CA, U.S.A.) 177

New type of equation for the relation between viscosity and particle content in suspensions
S. Yao and T. Matsumoto (Kyoto, Japan) 197

On the convected linear stability of a viscoelastic Oldroyd B fluid heated from below
R.W. Kolkka and G.R. Ierley (Houghton, MI, U.S.A.) 209

Vol. 25, No. 3

Stokes' first problem for viscoelastic fluids
L. Preziosi and D.D. Joseph (Minneapolis, MN, U.S.A.) 239

Relaxational interactions and viscoelasticity of polymer melts. Part II. Rheological properties in shear and elongational flows
V.S. Volkov and G.V. Vinogradov (Moscow, U.S.S.R.) 261

Multiple-time scale approach to stress growth in suspensions of rodlike macromolecules
W. Stasiak and C. Cohen (Ithaca, NY, U.S.A.) 277

Orientation and rheology of rodlike particles with strong Brownian diffusion in a second-order fluid under simple shear flow
B. Chung and C. Cohen (Ithaca, NY, U.S.A.) 289

Isothermal extrusion of non-dilute fiber suspensions
T.C. Papanastasiou and A.N. Alexandrou (Ann Arbor, MI, U.S.A.) 313

Damping of mechanical-systems oscillations by a non-Newtonian fluid with electric-field dependent parameters
Z.P. Shulman, B.M. Khusid, E.V. Korobko and E.P. Khizhinsky (Minsk, U.S.S.R.) 329

The flow of dulute polymer solutions in confined geometries: A consistent numerical approach
P. Biller and F. Petruccione (Freiburg, G.F.R.) 347

Longitudinal volume viscosity of poly(ethylene oxide)
J.V. Aleman (Madrid, Spain) 365
